

Postdoctoral/Research Associate Position in Renewable Energy Systems Engineering (CODE: PDF-RENE)

We are looking for individuals with research experience broadly in the area of energy and environmental systems engineering with a focus on renewable energy systems. Individuals applying for this position should have an interest and research experience in renewable resource-based energy conversion systems, specifically in the conversion of renewable resources to fuels and chemicals. The candidate should have experience in the development of techno-economic/life cycle assessment models for the estimation of the viability of these types of energy systems. Experience in the assessment of renewable resource potential and its supply are a desirable asset.

The candidate is expected to carry out research on assigned project(s). The candidate will also have an opportunity to develop and initiate new research activities in relevant areas and supervise junior researchers. The candidate may also have an opportunity to teach relevant courses in the Department of Mechanical Engineering based on their background.

The successful candidate will have the opportunity to join an active group of researchers in the areas of energy and environmental systems engineering supported by industry and government. The position is initially for two years and has the possibility of extension. The remuneration will be commensurate with qualifications. The position is available immediately and the applications will be reviewed as received. Due to the high volume of applicants, only those of interest will be contacted by our office.

Desired Qualifications: The candidates should have a PhD in a relevant engineering discipline with an emphasis on renewable energy systems.

Please include the CODE: **PDF-RENE** in your application. Interested candidates should send their curriculum vitae and the names of three references by e-mail to:

Dr. Amit Kumar
Professor,
NSERC/Cenovus/Alberta Innovates Associate Industrial Research Chair
in Energy and Environmental Engineering,
Cenovus Energy Endowed Chair in Environmental Engineering,
Deputy Director – Future Energy Systems
Department of Mechanical Engineering
University of Alberta
Edmonton, Alberta
Canada T6G 2G8
